

Interstate Service Guide and Pricelist
for Customers of Detariffed Access Services
within the operating territories
listed on the Title Pages

LEGAL NOTICE

The Ziplly Fiber Interstate Service Guide and Pricelist (Guide) applies to the Ziplly Fiber "Detariffed Services" (as defined below) and other telecommunications services that are set forth in this Guide.

Detariffed Services, as described in this document, are interstate special access services for which tariffs were withdrawn pursuant to FCC Report and Order, FCC 17-43, released April 28, 2017.

Beginning upon the effectiveness of the withdrawal of Detariffed Service tariffs, Detariffed Services will be subject to and provided pursuant to the rates, terms and conditions of this Guide, unless a separately executed service agreement between you and Ziplly Fiber provides otherwise.

Prospective customers wishing to purchase services at the rates, terms and conditions in the Guide may do so by initiating orders through the same processes used to order services from Ziplly Fiber's interstate access tariffs.

Service that is ordered without a separately executed service agreement between you and Ziplly Fiber that applies to that order, will also be subject to the Ziplly Fiber Interstate Access Service Agreement.

The services described in the Guide may be available through negotiated agreements, which may include rates, terms or conditions more favorable to you than those in the Guide. Prospective customers wishing to purchase Guide services at rates, terms or conditions different from those described in the Guide and the applicable Ziplly Fiber Interstate Access Service Agreement may contact their Ziplly Fiber service representative.

Ziplly Fiber reserves the right to change the rates, terms and conditions in the Guide from time to time. Notification of Guide changes will be made available at the Ziplly Fiber website.

Disclaimer: This documentation is for information purposes only and does not obligate Ziplly Fiber to provide services in the manner herein described. Ziplly Fiber reserves the right as its sole option to modify or revise the information in this document at any time without prior notice. In no event shall Ziplly Fiber or its agents, employees, directors, officers, representatives or suppliers be liable under contract, warranty, tort (including but not limited to negligence of Ziplly Fiber), or any other legal theory, for any damages arising from or relating to this document or its contents, even if advised of the possibility of such damages.

UNI Port With Access Line Connection:

ERS Premier UNI Port With Access Line Connection:

The percentage allocated for EVC bandwidth for ERS-RT is less than or equal to 50% of UNI Speed; and

The percentage allocated for EVC bandwidth for a combination of ERS-PD and ERS-RT is less than or equal to 100% of UNI Speed; and

The percentage allocated for EVC bandwidth for a combination of ERS-B, ERS-PD and ERS-RT is less than or equal to 600% of UNI Speed.

ERS - Premier UNI Port With Access Line Connection are offered at the following CLLIs.

<p>2. <i>Technical Specifications</i></p> <p>The technical specifications for Ethernet ELS are delineated in IEEE802.3-2002 and IEEE802.1Q.</p>											
<p>3. <i>Terms and Conditions</i></p> <p>a. A typical Ethernet ELS network will be limited to wire centers in a specific geographic location. Customers gain access to the shared Ethernet ELS network via ELS equipment deployed in Customer's serving wire center.</p>											
<p>b. Ethernet ELS provided with a UNI is available to Customers whose serving wire center is equipped with ELS equipment and whose location is within the maximum allowable range of the serving central office. The maximum allowable range is determined by the dB loss rate so the actual distance between the ELS equipped serving wire center and the Customer's location may vary due to the facility used in each serving arrangement. The maximum dB loss cannot exceed 20dB @1310nm for 10 Mbps service, 26dB @1310nm for 100 Mbps service, 9.5db @1330nm for 1000 Mbps or 22dB @1550nm for 1000 Mbps.</p>
